ALL SAINTS BUILDING WORKS UPDATE - 31st July 2011

Works are proceeding well and the following photos show some of the progress to date.

Scaffolding has been going up ahead of schedule. This has allowed us to see the poor condition of the gable **brickwork** (above the sanctuary). This will mean the parapet will need to be rebuilt and the metal crucifix, which is corroded; restored. Brickwork around the bell is also in poor condition and we are obtaining a price for bringing **the bell** back into working order which would be a lovely thing to do to celebrate All Saints' centenary year in 2013.

The rubbish mound area has been re-graded to provide a **level grassed area** so social events can be held more easily with space for gazebos, table and chairs. It will be seeded and cordoned off for while to let the grass grow.

The **Parish Room** is back to its brickwork ready for damp-proofing and various parishioners from All Saints are helping to select the new **kitchen**.

Next week we will have more detail on **fund-raising** ideas for you to support the cost of these works and some ideas for things you might like to sponsor (such as restoration of the bell). If you are interested in this, please contact Edward Cooke edward.cooke@mobile-sense.com or any other member of the Finance Committee.
